-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1 and 5-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bagshawe (USP 4,734,262) in view of EP 0353025 (references as EP hereafter).

Bagshawe teach in figure 10 a device comprising a first component(21) that is an optical chamber (e.g. see column 4 lines 50-51), a second component comprising a filter(8) and a third component (1) is a sample receiving chamber. The components are arranged in the claimed relationship of the second component filter(8) positioned below the third component receiving chamber and above the first component optical chamber.

This reference is silent to having a first and second optical chambers and contact of the sample and preloaded reagents upon proper alignment of the device.

See the appropriate paragraph of the 2/2/05 Office action for the teachings of EP. Additionally EP teaches in column 1 lines 37+ it is an improvement over Bagshawe. EP teaches in column 3 lines 1+ use of control(s) in additional optical chambers to gain the advantages of minimizing false positive/negative results. Column 4 lines 7+ teach the reaction is initiated when the upper housing(59) moves relative to the lower housing(60) which has been read on the claimed alignment of the chambers. The relative movement to initiate the reaction is advantageous because pressure is not required as in Bagshawe to initiate the reaction.

It would have been within the skill of the art to modify Bagshawe (USP 4,734,262) in view of EP 0353025, and use additional optical chambers to contain a control and the relative sliding to initiate the reactions to gain the above advantages.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
